NOTEWORTHY NEWS

- If you missed the Roseburg Area Chamber of Commerce 2008 Business Outlook Forum, it was interesting enough. The quick summary was simply to say we haven't seen the same economic hardships as many of the other areas of the nation. This isn't to say we haven't been affected, but perhaps not to the same degree as our fellow countrymen.
- Our appointment as an Authorized Sales and Service Dealer for the Sioux brand of steam cleaners and steam generators is complete. Sioux is the industry leader in custom tailored industrial grade steam cleaning/generating equipment. Operating at 320 deg. F, instead of the usual 250 deg. F, their actual "steam" cleaners offer far more heat energy for cleaning than that offered by competitors in the industry. Sioux has also come up with a unique way to handle vegetation control for farms and wineries that may be of interest. By pulling an oil fired steam generator behind a tractor along with some unique steam application equipment, undesired vegetation can be controlled by compromising the waxy surface of the cells which prohibits photosynthesis, immediately killing the plant. This results in a chemical free killing off of unwanted vegetation.
- Watch for big news in our next issue, many exciting things are planned for this year!

Weed eradication unit

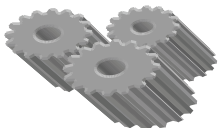

Chemical free weed control!

(Results after 24 hours)

WORKING IT HARD THIS WINTER??

- Here's some troubles we've seen customers encounter and how you can avoid them.
- Generators— Two problems tend to show up the most. Lack of daily or weekly maintenance. These things tend to get a lot more hours on them in a hurry than most pieces of equipment, frequently running 6 or more hours a day, every day. Check that oil! Weekly at minimum, daily if possible. Also check the air filter weekly, and remember to turn off the gas if transporting.
- 110-120 volt Electric Air compressors—Awfully hard to start up in cold weather, and popping circuit breakers. Can you get them into a heated area or at least start them on household current in the morning before you leave and let them warm up the oil for a while?

WINTER ACTIVITIES AROUND OREGON

The growth of the snowmobiling sport has been tremendous, advancements in outdoor riding gear and the machines themselves has turned a niche sport into something families are turning to at an ever increasing peace.

Speaking of family sports, if you're looking for something to get the kids out of the house, and own a computer with internet access, an investment of another \$100 or so into a portable GPS receiver can produce countless hours of outdoor entertain-

Crater Lake Oregon

ment. Visit www.geocaching.com, for more information. We've entertained everyone from young kids to grandparents with this "treasure hunting" experience. *Photo courtesy of Rick Rockholt Diamond Lake Resort*

Dutch Oven Cobbler

- One large can of fruit
- One box cake mix

Put can of fruit into Dutch Oven. Pour cake mix over fruit in oven, don't mix. (If using conventional oven and pot be sure to place a lid on the pot) and cook at 350 deg. for 30-40 minutes. For a Dutch Oven, this means approximately 12 briquettes on the lid and 8 under the oven. If you've never used a Dutch Oven for camping you don't know what you're missing! Books are available with every kind of recipe you can imagine.
